SUMMARY

BE-IT graduate seeking an entry-level Java Developer / Java Backend Developer role, with hands-on project experience in Java, Spring Boot, RESTful API development, SQL, and layered application architecture. Familiar with JPA/Hibernate, CRUD operations, and Git, with a focus on developing maintainable backend applications.

EDUCATION

Bachelor of Engineering (Information Technology)

- Theem College Of Engineering, Mumbai University (2022-2026)
- CGPA: 7.7/ 10

Higher Secondary (12th)

- Tarapur Vidya Mandir & Junior College - Maharashtra Board (2022)
- Percentage: 63.33%

Secondary (10th)

- CTES English Medium school - Maharashtra Board (2020)
- Percentage: 82.60%

INTERNSHIP

Zyberly (Duration January 2025 - March 2025)

- Assisted with website development, maintenance, and content updates.
- Supported website improvements and troubleshooting while collaborating on development tasks.

CERTIFICATION

Advance Java Full Stack Development (July 2026 – October 2026 | Completed | Offline Training)

Completed an Advanced Java Full Stack Development Certification from Anudeep Foundation, covering Core Java, Advanced Java, Hibernate, and Spring Boot with Offline Training and gained hands-on experience in Java full-stack development.

PROJECTS

Travel and Tourism Management System

- Developed a Travel and Tourism Management System using Java, Spring Boot, React, HTML, CSS, and JavaScript.
- Created features for tour packages, user management, and booking.
- Used SQL database to store and manage user and booking details.
- Implemented CRUD operations for managing users, tour packages, and bookings.

Smart Automation & Energy Prediction System

- Developed a smart home system enabling voice and hand-gesture control of appliances using Python and ESP32.
- Implemented face recognition security and intrusion detection using ultrasonic sensors.
- Integrated appliance usage tracking and electricity bill prediction based on usage data.
- Demostration Video in a real home environment: **http://bit.ly/4ojXh4k**

Event Management System

- Built an event management backend using Java & Spring Boot.
- Developed REST APIs for event CRUD operations.
- Designed and implemented RESTful APIs for CRUD operations, enabling seamless communication between clients and the backend.
- Implemented a layered architecture with Controllers, Services, and Repositories, following clean coding and backend development practices.

ACHIEVEMENTS

- Secured 1st Rank in Innovation 2.0 Interdepartmental Project Competition (2025).
- Secured 2nd Runner-Up in Mini Project Exhibition (2025).
- Secured 3rd Position in INNOVATHON'24 Project Competition (Web Development Business Model) (2024).
- Participated in WEBCADE 2024 – 12-Hour Web Development Hackathon – St. John College of Engineering & Management.

SKILLS

Programming	Java, Python, JavaScript
Backend	Spring Boot, RESTful APIs, JPA, Hibernate
Core Concepts	Object-Oriented Programming (OOP), CRUD Operations, Layered Architecture
Frontend	React.js, HTML, CSS
Database	SQL, MySQL
Tools	Git, GitHub, Postman
